

Joe Given, (singer, songwriter, performer) - [www.joegiven.com](http://www.joegiven.com)

Joe usually performs as a solo artist, although sometimes plays with other musicians. The following requirements are based on Joe playing as a solo artist, (singing & playing guitar)

### Stage Plot

When Joe performs as a solo artist, he sings and plays his guitar. He simply stands near the center of the stage, fairly close to the front of the stage.

He requires the following stage set up:

- a vocal mic., on a boom stand, to be in the center of the stage, fairly close to the front.
- A stool close by, if his set or show is longer than 30 minutes, so that he can sit for the occasional song
- A small table or extra stool beside him, for drinking water, set list, extra picks etc.
- Drinking water
- He needs some room to move, so please allow a few extra feet around where he stands

### Joe Given - Technical Requirements:

Joe usually plays an acoustic guitar, which has a built in pick-up. He also plays an electric guitar on occasion.

(If he plays his electric guitar, he needs an electric guitar amp, to plug his electric guitar patch cord into - but he usually plays his acoustic guitar).

- If he plays his acoustic guitar, (which has a built in pick-up), he needs either an acoustic guitar amp, or a DI Box and / or mixing board, to plug his acoustic guitar patch cord into - to connect with whatever sound system is available.

Joe also needs the following:

- a sound system that is suitable for a singer
- a vocal mic., for singing into
- a boom stand for the vocal mic.
- a guitar stand
- close access to power

Please let us know if the above equipment is available, and if there will be a sound technician available during the show. Please let us know, in advance, what sound equipment etc., Joe needs to bring.

Thank you,

Janet G, (Joe's manager)
